Enriching lives of at-risk children one child at a time!

A special bond – a unique approach

Horse Sense for Kids' recognizes that empowering children by addressing their mental health needs is one of the most impactful things we can do to put them on a better path. Embracing the magical power of the horse-human connection, the horsemanship programs succeed in reaching at-risk children (those from low-income homes and/or foster homes, and/or those with mental health challenges, and/or Indigenous) where other approaches have failed.

Promoting academic and life success

Kids who take part in HSFK horsemanship programs learn skills that go far beyond how to feed, groom, saddle and ride a horse. Alongside their horses, peers, and mentors – in the open-air farm country and stables – children acquire invaluable social, emotional, and character qualities that leave them better equipped to confront life challenges. Through the connections built during the programs, children learn that they are capable of making valuable contributions to other living beings, and that the part they play in society is important.

Benefits from the experience have been dramatic based on the feedback from parents, educators, and the children themselves. With a growing number of children who are burdened by depression, anxiety, isolation among other mental health challenges, HSFK is committed to expanding the program to include as many children as possible.

After School Programs Make a Difference!

Afterschool programs keep young people safe and out of trouble during a vulnerable time, but they do much more. Studies done over the past two decades show that these programs help children:

- Gain self-control and confidence
- Develop strong social skills
- Build healthy relationships with peers and mentors
- Improve school attendance and behaviour
- Have higher graduation rates
- Reduce risky behaviours and criminal activity
- Gain responsibility and workforce skills

Be part of the magic and help more kids!

Most mental health issues have their onset in childhood or youth. Knowing that improved academic achievement and better health outcomes hinge on early identification and intervention, we have a solution that has proven to make a difference.

Please consider sponsoring our upcoming Wild West Day. The event is well attended by the community, providing you a unique opportunity to promote your company or service and support at-risk children in Niagara. All proceeds will go to support HSFK's programs.

Contact Brenda Langendoen at info@HSFK.ca or 905-892-RIDE to learn more about how you can transform a child's life!
